

WARPSEAL

The high speed sealing system

Wish you could outpace them all?
DURABASE WARPSEAL -
Seal at Warp Speed!

WARPSEAL - LIGHT & YELLOW

Take the fast lane through the construction site - with no tile adhesive in tow. Around 3.2 kg of glue and 0.5 to 1 litre of water is used for each square meter of sealing - the self-adhesive DURABASE WS sealing system does without any of that.

WARPSEAL

The high speed sealing system

**No more residual moisture
lingering behind the tile seal
for years - Sealing at Warp Speed!**

DURABASE WS
THE HIGH SPEED SEALING SYSTEM

DURABASE WS

WARPSEAL - SAFE AND YELLOW

No contraflow when sealing the bathroom.
The self-adhesive DURABASE WS sealing system
requires no water and is ideal for installation on
gypsum and mineral plaster - this means no extra
cement plaster in the bath area

WARPSEAL

The high speed sealing system

Just before the wedding
seal the bathroom quickly.
Always with DURABASE WARPSEAL -
Seal at Warp Speed!

WARPSEAL - CLEAN & YELLOW

Without the dust and dirt, sealing work
is no longer a problem with the DURABASE WS
self-adhesive sealing system. No dust -
no mixing dirt - clean work sessions each time

WARPSEAL
The high speed sealing system

**No more residual moisture
lingering behind the tile seal
for years - Sealing at Warp Speed!**

WARPSEAL - DRY & YELLOW

No more traffic jams caused by the sealing project.
No drying times with the DURABASE WS self-adhesive
sealing system (for example, with liquid sealing 2 passes
with a waiting time of approx. 4 hours in between are
needed AND curing time on top of that.)

WARPSEAL

The high speed sealing system

Within seconds, DURABASE WARPSEAL achieves an adhesive strength of more than 20 t/m² - Sealing with Warp Power!

WARPSEAL - QUICK & YELLOW

Sealing without any speed limits - installation is twice as fast as no time needed to mix and apply adhesive. The self-adhesive DURABASE WS sealing system: Apply primer - fasten - peel off protective film - press on - put tile on top - done!

DURABASE WS

WARPSEAL

The high speed sealing system

Sealing with the usual
roll width of 1 m - but
really fast with self-adhesive
Sealing with Warp Speed!

WARPSEAL - WIDE & YELLOW

The 1.0 m extra-wide sealing membrane is the base of the DURABASE WS self-adhesive sealing system. A special squeegee is included with each roll for simple and easy handling.

WARPSEAL

The high speed sealing system

WARPSEAL - WATERTIGHT & YELLOW

DURABASE WS seals your dream bathroom as safely
as a boat takes you to the island of your dreams.
This is also confirmed by technical tests -
DURABASE WS is tested according to ETA and abP.

WARPSEAL
The high speed sealing system

WARPSEAL - WATERTIGHT & YELLOW

As specialists in the sealing of bathrooms and wet rooms, we know what counts in areas like these. In addition to the self-adhesive sealing membrane, the WARPSEAL sealing system offers all the sealing elements you need for corners, tubs and shower wedges - all self-adhesive, of course

WARPSEAL

The high speed sealing system

WARPSEAL - EASY & YELLOW

Silicon-treated masking paper on the back of the self-adhesive sealing elements is always slotted or has a grip tab to make handling easier. Tiles and other wall and floor coverings can be applied immediately.

WARPSEAL
The high speed sealing system

**DURABASE WS - it sticks
to anything - with Warp Power!**

WARPSEAL - FLEXIBLE & YELLOW

The self-adhesive DURABASE WS sealing system sticks to a wide variety of materials such as wood, concrete, screed, plaster, plastics, stainless steel, glass, enamel and cement-based building materials. All parts of the seal are flexible and stretchable and adapt optimally to the smallest imperfections.
